DETAILED ACTION

1. Claims 1-9 are allowed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claims 1-9 are allowable because none of the prior art discloses an apparatus for obtaining dielectric constant and other measurements of a sample, comprising: a pair of mirrors, each mirror is operable to provide corresponding microwave output signals; a precision drive unit operably connected to a sample holder to tilt the holder relative to a mirror; a precision drive unit connected to the holder to move the holder along a vertical axis; a precision drive unit connected to the holder to move the holder along a second horizontal axis; and the drive units being carried by a bearing slide which is moveable to position the holder into and out of an open cavity resonator, and in the combination as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Heidinger et al. discloses a Fabry-Perot resonator with an open cavity having a spherical and planar mirrors, the planar mirror is operable to provide microwave output

signal. The planar mirror along with a clamped sample is rotatable and movable in the horizontal direction.

Tricoles et al. disclose antenna for transmitting microwave signal toward a test panel supported on a turntable. The turntable is operable to rotate the test panel.

Hrubesh et al. disclose a gas analyzer using a Fabry-Perot cavity resonator. One plate of the resonator is moveable toward and away from the other to vary the resonant frequency of the cavity.
